# How Are Pregnant Women Vulnerable?

- 01 Various risks inherent in pregnancy
- 02 Relevance of mothers' and fetus's health
- 03 Inaccessible treatment in labor-approaching
- 04 Emotional crisis caused by uncertainties

*Leave No One Behind*

# Problems that They May Encounter

1. Inaccessible inpatient care for infected pregnant women
2. Unavailable antenatal care
3. Unavailable pre-delivery care leading to anxiety
4. Difficulty in breathing for the newborn (mothers recovered from mild case)

# Problems that They May Encounter

**5. Slow supply of medicine for high-risk pregnancy**

**6. Breastfeeding problems of infected moms**

**7. Maternal-infant products in short supply**

**8. Stigmatization of the virus leading to recovered moms' anxiety**

# Support Provided by Us
