Technical workshop: Validation of the prototype for the new hazardous events and disaster losses and damages tracking system

Recapitulating Day 1
Day 2 – 4 May 2023

May 3\textsuperscript{rd} and 4\textsuperscript{th}, Bonn
### Key takeaways from Day 1

<table>
<thead>
<tr>
<th>Application</th>
<th>Scoping</th>
<th>Standards</th>
<th>Governance</th>
</tr>
</thead>
</table>
| • Document and demonstrate use cases  
  • Need for more awareness and capacity | • Events/Incident vs disasters  
  • Hazard-event-impact continuum (also identify data gaps)  
  • System features vs capacity/maturity  
  • Level of disaggregation  
  • Modular approach | • Taxonomy: Hazards and impacts  
  • Methodologies  
  • Need to better engage the statistical community | • Global coordination  
  • National coordination – horizontal and vertical  
  • Coordination with partners |
