

2023 Edition - Status Report on Target E

“From Developing to Implementing National and Local DRR Strategies:
Taking Stock of the Midterm Review of the Sendai Framework on Target E”

Status of DRR Strategies

National

Number of countries with national DRR strategies

55 in 2015

125 in 2022

Overall increase of 127%

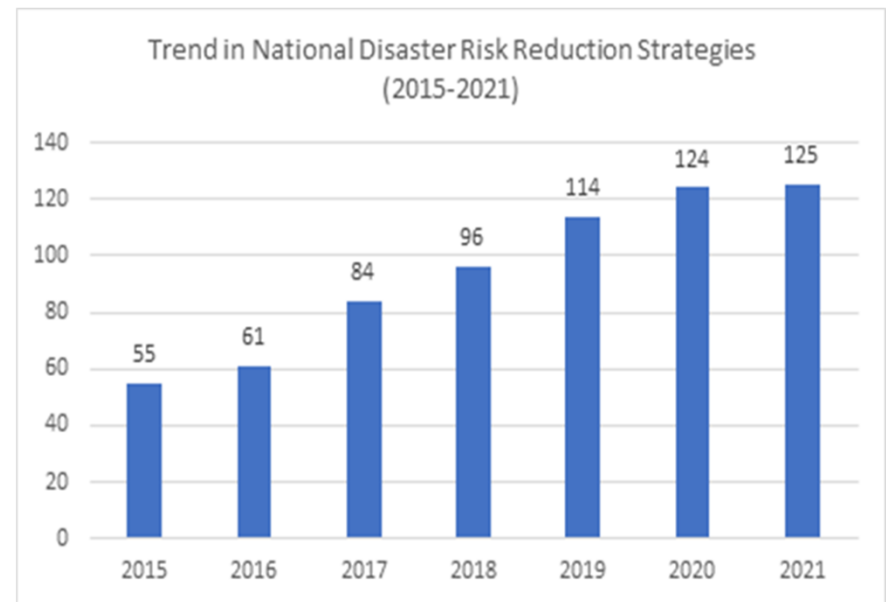

Local

Number of countries with local DRR strategies

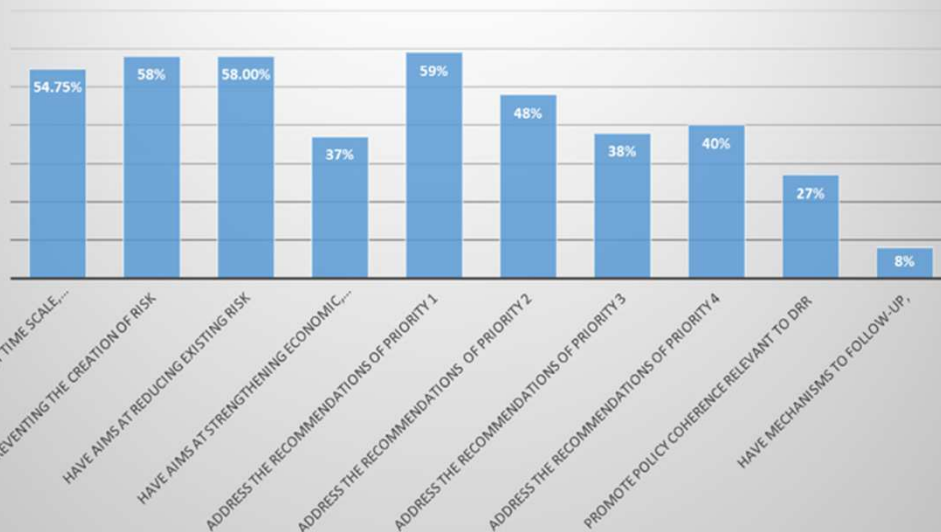

51 in 2015

91 in 2022

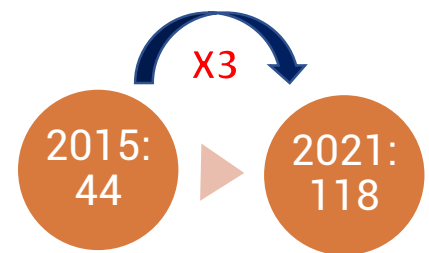

Overall increase of 78%

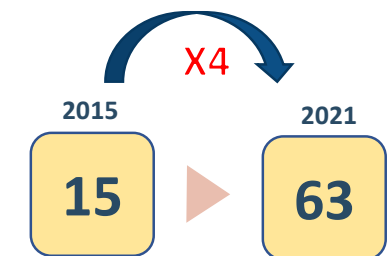

Conformance of the Assessed National DRR Strategies with the 10 key Elements of alignments with SFAW

Number of countries with DRR strategies promoting policy coherence and compliance with the SDGs and the Paris Agreement

Number of DRR strategies following a **comprehensive alignment with the Sendai Framework**

Key findings emerging from the Target E report 2023

More systematic alignment with Sendai Framework

Qualitative assessment tools and analyses of DRR strategies developed since 2019 are boosting strategies alignment with the Sendai Framework principles

Integration with climate change

Many governments have developed their DRR strategy in line with NAPs and integrated climate change considerations into their DRR strategy

Coherence with SDGs

Greater coherence established between DRR and SDGs: 20 out of 30 UNSDCF's signed in 2021 include a reference to DRR strategies.

New thematic focus

Disaster induced displacement, biological hazards are being increasingly integrated into DRR strategies based on countries' policy priorities and needs

Stakeholders' engagement

Stronger engagement of UNRCs / UNCTs, regional IGOs / RECs
17 UN Organizations supported 90 countries in 2021 in developing, updating or implementing 232 DRR strategies

DRR Financing and investment

Remains an area of urgent priority and attention across regions

“DRR Financing and investment remains an area of urgent priority and attention across regions”

‘Budgetary allocation and funding opportunities should be systematically considered as part of ‘financing plans’ to ensure DRR strategies implementation’.

Innovative, forward-looking and inclusive integrated strategies must be designed in full coherence with the SDGs and Paris Agreement, and account for the realities of systemic risk

Multi-stakeholder and cross-sectoral mechanisms reflecting gender equality and social inclusion need to be improved

There is a pressing need to ensure coherence and effectiveness across national and local strategies to reinforce their implementation and impact

Recommendations to accelerate DRR strategies development and implementation

Innovative, forward-looking and inclusive integrated strategies

must be designed in full coherence with the SDGs and Paris Agreement, and account for the realities of systemic risk

A unified risk understanding

and approach is required across governments and stakeholders as the basis to design a national strategy that responds to the country's needs and benefits from full buy-in for implementation

Enhancing DRR capacities

Governments have the responsibility to foster capacity-building to effectively support and guide DRR strategies' development, understanding and implementation

More systematic engagement

of stakeholders and local communities must be encouraged in developing and implementing DRR strategies, as a shared responsibility

Whole of society approach to DRR

Multi-stakeholder and cross-sectoral mechanisms gender equality and social inclusion mechanisms need to be improved through further practices.

DRR financing and investment

Budgetary allocation and funding opportunities should be systematically considered as part of 'financing plans' to ensure DRR strategies implementation.

Better access to and collection of data

Governments have the responsibility to make data emerging from national risk assessments accessible and available to support DRR strategies, and to evaluate the adopted strategies' impact

Enhanced vertical integration between national and local levels

is a pressing need to ensure coherence and effectiveness and to reinforce DRR strategies implementation and impact at national and local levels
