Drivers for Displacement
Environmental degradation, natural hazards, and climate change and the effects of rapid urbanization, water insufficiency, and food and energy insecurity, exacerbated by desertification, drought, flooding, and the growing severity of disasters.

Resettlement Programme in Sri Lanka

Displacement - temporary/Permanently Temporary Migration Seasonal Migration
Resettlement Process - Case Study

• **Aranayake, Kegalle Sri Lanka**- Two years after the resettlement
  • In Aranayake, 512 families have resettled at ten relocation sites or at their own residences.
  • The study used a qualitative methodology. Data was gathered from structured questionnaires, interviews, and focused group discussions
  • Considered- socio-economic condition, physical movement, adopted lifestyles, engagement with government and other administrative entities, attitudes towards different housing schemes (owner-driven, government-driven, donor-driven) in the same location, and their satisfaction regarding government provisions (financial allocation systems and other support).
  • 60% displeasures at their living conditions after resettlement.
  • 24% satisfied as they had easy access to basic needs and were free of landslide risks.
  • 16% Overall Neutral attitudes
  • local and international donors’ contributions to IDPs but resettlement process did not adequately address the requirements of the displaced community.
  • In the post-disaster era, families who resettled have experienced a deterioration in their socio-economic status.

• **Case Studies**- Tsunami Resentment Programme, Meeriya Bedda Landslide Resettlement programme
Challengers & Issues

- **Land Issues** - Difficulties in providing basic infrastructure due to geographical situation
- **Land selection, Houses designing and construction**
- **Institutional Arrangement** - Long delay in project completion due to limited stakeholder involvement
- **Livelihood options and Resettlement Social harmony** - Conflict between host and resettled community social status, employment and cultural values of people
- Settlements have been affected by **unexpected natural hazards** (Due to lack of information)
- In cooperation of **BBB**
- Lack of **Knowledge** on DRM and CCA
- Uncontrol Disaster Displacement increase existing risk and create new risk
Thank you
